ROVER ORIGINAL

Features

Back shell design breathes like mesh.

The base tray provides approximate 35 liters space for personal belongings.

Plastic seat shell comes in 3 colour options and require less maintenance.

Foldable A4 size writing tablet with Anti-Panic mechanism is tested to 50kg loads.

The Modern Classroom

Rover is the tool that will cross boundaries of “immobile” classrooms, enabling educators to provide a modern and effective arena for learning. Rover is designed to be mobile and adaptable in limited spaces and dense classrooms. A room can be transformed from theatre setting to a U-shaped setting effortlessly by moving the chairs around. This allows for maximum utilisation of space as well as increasing interaction between student and teacher.

ROVER 2
